GLOW WORMS

GLOW WORM TOURS - SAIL PROVO

Glow Worm Cruises start 30 minutes before sunsets and takes you slowly to the Turks and Caicos banks where we silently wait for the spectacular event. Every month 2 to 6 nights after the full moon, a mesmerizing phenomenon occurs in the ebbing tide of the banks. 50 minutes after sunsets the marine worm *Odontosyllis* performs a most unusual mating ritual. The sparkling show starts with the females spiraling to the surface emitting a pulsating green luminescence as they release an egg mass. The male, glowing as well, does a zig-zag dance until he encounters their eggs, darts around in the mass causing an even brighter glow. He then dies and sinks to the bottom of the sea.
